

Concept Map

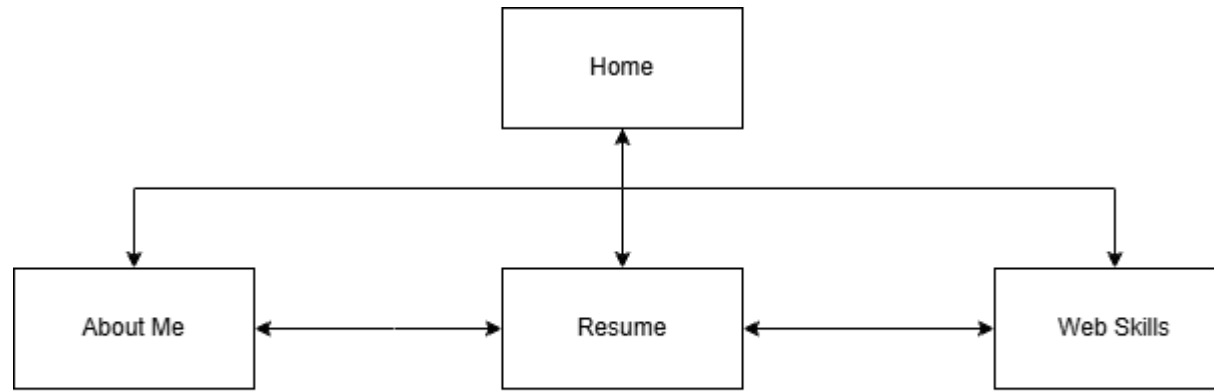

- Navigation Buttons –
Colour #1985A1, on hover change to #4C5C68
- Typography –
font-family: Arial, sans-serif (if Arial unsupported by browser), keep consistent across entire html element.
- Colour Scheme –
#DCDCDD background with black or near black text for readable contrast.
#4C5C68 contrasts on header/footer etc with white text
#1985A1 blue colour to include coloured elements
- Logo Placement –
Logo and Favicon on every page
- Print-Friendly Design –
Print View = Navbar removed, white background, and larger font.

Hero Image

rrack_A3_webskills.html 5/5/2026
* Content from A2 is good, keep it
* Add hero image to improve look
* Attempt to section content to improve readability and presentation
* Logo + Favicon on each page
* Trial Grid layout two column for uniformity

Copyright Symbol, Permissions, and Contact detail in Footer (all pages)

Storyboard – web skills

Requirement	Test Method	Anticipated Result
External CSS	Review HTML Code	No trace of inline/internal css.
NavBar using buttons + Identical	Page by page review	NavBar presents the same on each page.
Print Layout	Print and compare	No NavBar, background colour/image removed and larger font.
Logo/Favicon	Browser Tab & page comparison	Favicon on each tab, Logo on each page.
Table	Inspect page	Table displays.
Validation	W3C validator	Ensure no errors.
Phone, Email links	Click Links	Ensure successful.
Page nav links	Click Links	Ensure no dead links & home accessible from each page.
Browser compatibility	Test in Chrome, Edge	Ensure page displays.

Testing Plan

Document checking completed. No errors or warnings to show.

Used the HTML parser.

Total execution time 5 milliseconds.

Validation of all HTML & CSS

Requirement	Completed
External CSS (includes at least one type selector & one universal selector)	✓
Navbar uses Buttons & Identical on each page	✓
Print Friendly	✓
Logo & Favicon	✓
Footer content (i.e. Copyright symbol, contact detail, permission)	✓
Table on Resume page	✓
Ample Comments in Code	✓
HTML & CSS Validation with no errors	✓
Concept Map	✓
CSS Design Demo	✓
Navigation Map (logical)	✓
Structure Chart (Physical)	✓
Storyboards	✓
Testing Plan	✓
Personal Reflection & Changes since A2	✓
Submit a single .zip file that includes all files, folders and subfolders	✓

Requirements Checklist

Upon completing this assessment, I feel that since A2 I have improved in the following areas:-

- Did entire plan phase prior to any coding, this made the coding much quicker and improved consistency and overall look of the site.
- Utilised CSS Grid to layout my pages which gave the site a much better structure and consistency. I also found this made building the page quicker as I focused on inputting all the HTML and then styled after setting my Grid.
- Set a colour pallet in the design phase that suited a professional resume, in A2 I just used trial and error with colours which took a long time to decide on a finished style.
- Added the table, this gives a professional look and with more time I feel I would use in more areas of the site.
- CSS Grid made inputting images and aligning them with other sections easier.
- I have made all image links include ../ to be sure all files load however I understand they are not required when in same folder level.
- I have been more thorough in ensuring all requirements were met as I overlooked one or two in A2.
- Adding the print functionality highlighted that function to myself.
- js folder added purely in preparation for A4.

Improvements

As I spend more time doing complete projects such as this assessment web page it helps me to understand the entire product lifecycle.

Each time I start coding a page after careful planning my speed is improving and particularly CSS is making more sense to me from the perspective of being able to style very specific elements using selectors.

I do find it tricky to come up with what I feel is adequate content volume but understand that in the real world that may not be a big issue and that understanding the layouts, HTML, CSS, and JS are more important.
